

EnergyAction

- ▶ Energy Procurement
- ▶ Onsite Generation and Networks
- ▶ Contract Management
- ▶ Energy Efficiency

Energy Action is Australia's leading energy consultancy, with more than 100 energy experts in eight locations nationally.

Energy Action offers full service energy management – end to end – energy procurement, contract management, environmental reporting and identifying opportunities to reduce usage and costs through efficiency initiatives and tariff reviews. We also help you increase the value of your assets with embedded networks, microgrids, solar and building ratings improvements.

Our expertise

A national team with knowledge and capability to offer better ways of buying, using and generating energy.

Our independence

To fight for a better deal, ensure “apples-to-apples” comparison and that retailers and providers deliver what they promise.

Our systems and processes

Ensure automated and reliable delivery of valuable information, validated bills, tariff reviews and insights.

We have arguably the most powerful database in the country – comprising 20 years of market intelligence spanning the major retailers and over 5,000 commercial energy users - from which we draw insights and analysis for our customers.

This puts us in a position where not only you, but the energy industry, can trust us to put our energy where it really matters.

*Welcome to
Energy Action.*

*We help businesses make
better decisions to save on
energy costs, reduce
emissions and increase the
value of their assets.*

John Huggart CEO

Reduce the cost of energy

Ask us to take action and buy energy for your business at a lower cost through a complete range of procurement strategies including;

- ▶ Auctions (via the AEX)
- ▶ Tenders (small and large market)
- ▶ Progressive and structured purchasing
- ▶ Corporate power purchase agreements

Whilst offering customers multiple procurement options, energy innovation started with our revolutionary auction platform, the Australian Energy Exchange (AEX) where your business can save 6.8% on your next energy agreement in 10 minutes.*

If you spend \$25,000 or more per annum, an auction between up to twelve competitive energy retailers is often the fastest way to secure the best contract.

Invest ten minutes of your time with our helpful, knowledgeable energy experts and find out more about the Australian Energy Exchange (AEX) platform and our other procurement options.

We actively help you save time, hassle, and manage energy effectively through our Energy Metrics service offering;

- ▶ Online reporting
- ▶ Bill validation
- ▶ Budget and tariff reviews
- ▶ Energy insights
- ▶ 24/7 client portal

Lower emissions

We identify opportunities to help you lower usage and emissions with business and building monitoring, audits and energy efficiency initiatives. We help you generate and manage self-sufficiency with solar and batteries or corporate power purchase agreements.

Increase the value of your assets

Energy Action will help you increase the value of your assets with embedded networks, microgrids, solar and building ratings improvements.

Established in 2000, we are now Australia's leading electricity, natural gas and environmental certificate services provider, with 8 offices nationwide.

ASX (ASX:EAX) listed and one of few energy consultants who holds an Australian Financial Services Licence (AFSL No. 362843) which means we operate to the highest compliance and governance standards.

Publisher of the Energy Action Price Index (EAPI), Australia's only electricity price index – a long term indicator of prevailing retail energy prices in each competitive market based on thousands of actual auction outcomes.

Energy Action is a 100+ nationwide team of multi-award winning energy experts.

- ▶ Over 2,000 embedded network clients
- ▶ Over \$16.5 million tariff review savings since 2015
- ▶ Over \$4.7 million in bill validation savings since 2015
- ▶ More than 1,000 procurement events per year
- ▶ More than 70 NABERS ratings per year
